Canal Walk Rules and Regulations

Section VI.Q. Fire Tables and Outdoor Heaters

Fire tables and outdoor heaters may only be placed in the rear of a home on a patio or deck and must use either propane or natural gas as a fuel. All manufacturer specifications and guidelines must be followed with respect to proper installation and use. This includes locating fuel lines and hoses where they will not create a tripping hazard and positioning the unit a safe distance from the house and outdoor furniture. When in use, the unit must be attended by an adult and should not be used for cooking.

Fire pits that burn a fuel other than propane or natural gas are prohibited.

Note: The rule regarding fire pits in Section VI.F.8 is hereby rescinded.
